Haryana STF Narcotics Intelligence — Briefing

924 CONTENT ITEMS	13 SOURCES	11 CLUSTERS	4141 SIGNALS
----------------------	---------------	----------------	-----------------

BOTTOM-LINE JUDGEMENT

Automated monitoring of 924 content items from 13 sources across RSS news, Telegram intelligence channels, official government sources, and dark web reveals 11 narrative clusters and 4141 intelligence signals related to drug trafficking activity in Haryana. Key findings: Punjab-Haryana drug corridor remains the primary transit route for Afghan heroin to Delhi-NCR; chitta epidemic in Ambala-Karnal belt causing youth fatalities; cross-border drone-based smuggling increasing. Engine C identifier intelligence extracted phone numbers and Telegram handles from unstructured content, linking identifiers across multiple independent sources — automating cross-source correlation that would require manual search across hundreds of messages. Collection period: 13 Aug 2024 to 06 Jul 2026.

Sourcing, Limitations & Confidence

Data Acquisition

Automated open-source collection via Anveshak platform. Sources configured by analyst — web scraping (Crawl4AI), social media adapters (Telegram, Reddit, Bluesky, X), and RSS feeds.

Analysis Period

924 content items from 13 sources, processed through multilingual NLP (spaCy + NLLB-200), narrative clustering (Leiden algorithm), and entity extraction.

Confidence Calibration

Confidence level (74%) reflects the fraction of narrative clusters corroborated by 2+ independent sources. Individual source credibility scores are auto-adjusted based on deepfake detection, contradiction analysis, and analyst feedback.

Limitations

This report is a point-in-time snapshot. Source credibility scores may have changed since generation. All AI-generated summaries require analyst verification. Legal provision mappings (if present) are AI-generated and require verification by a qualified legal officer.
