BOTTOM-LINE JUDGEMENT

Automated monitoring of 1,060 content items from 10 sources across RSS news, Telegram fraud channels, dark web, and social media reveals 3 narrative clusters and 946 intelligence signals related to cyber fraud activity in Telangana. Key finding: Telegram handles (doingpay_sh, doingpay_ff) appear across 2+ independent sources, indicating coordinated fraud operator networks. Engine C identifier intelligence extracted 11 actionable identifiers (Telegram handles, phone numbers, payment domains) from unstructured content — automating cross-source correlation that would require manual search across hundreds of messages. Collection period: 24 Jun 2021 to 01 Jul 2026.

Sourcing, Limitations & Confidence

Data Acquisition

Automated open-source collection via Anveshak platform. Sources configured by analyst — web scraping (Crawl4AI), social media adapters (Telegram, Reddit, Bluesky, X), and RSS feeds.

Analysis Period

1060 content items from 10 sources, processed through multilingual NLP (spaCy + NLLB-200), narrative clustering (Leiden algorithm), and entity extraction.

Confidence Calibration

Confidence level (75%) reflects the fraction of narrative clusters corroborated by 2+ independent sources. Individual source credibility scores are auto-adjusted based on deepfake detection, contradiction analysis, and analyst feedback.

Limitations

This report is a point-in-time snapshot. Source credibility scores may have changed since generation. All AI-generated summaries require analyst verification. Legal provision mappings (if present) are AI-generated and require verification by a qualified legal officer.
