BOTTOM-LINE JUDGEMENT

Automated monitoring of 225 messages from 3 Telegram channels reveals an active cross-border cyber fraud network operating through Hong Kong and China-based phone numbers with Indian mule account recruitment. Key findings from automated identifier extraction: • 35 Hong Kong (+852) phone numbers linked to fraud operations • 5 Chinese mainland (+86) phone number — cross-border link • 2 Indian phone numbers tied to mule recruitment • 78 Telegram handles operating as payment agents (USDT exchange, UPI panel operators, money transfer fronts) No officer searched for these identifiers. The system extracted phone numbers, Telegram handles, and payment references from raw Telegram messages and linked them across posts automatically. Each identifier is a potential lead for financial investigation. Collection period: 25 May 2026 to 23 Jun 2026.

Sourcing, Limitations & Confidence

Data Acquisition

Automated open-source collection via Anveshak platform. Sources configured by analyst — web scraping (Crawl4AI), social media adapters (Telegram, Reddit, Bluesky, X), and RSS feeds.

Analysis Period

225 content items from 3 sources, processed through multilingual NLP (spaCy + NLLB-200), narrative clustering (Leiden algorithm), and entity extraction.

Confidence Calibration

Confidence level (85%) reflects the fraction of narrative clusters corroborated by 2+ independent sources. Individual source credibility scores are auto-adjusted based on deepfake detection, contradiction analysis, and analyst feedback.

Limitations

This report is a point-in-time snapshot. Source credibility scores may have changed since generation. All AI-generated summaries require analyst verification. Legal provision mappings (if present) are AI-generated and require verification by a qualified legal officer.
