Nagaland Social Media Monitoring — Intelligence Overview

3337 CONTENT ITEMS	17 SOURCES	25 CLUSTERS	52 SIGNALS
-----------------------	---------------	----------------	---------------

BOTTOM-LINE JUDGEMENT

Automated monitoring of 3,337 content items from 17 sources across Nagaland-focused media reveals 25 distinct narrative clusters and 52 intelligence signals. Key emerging narratives include healthcare infrastructure failures (6 independent sources), communal identity tensions around disparaging media coverage (6 sources), tobacco ban confusion impacting Dimapur businesses (3 sources), and drug-related community mobilization in Wokha (2 sources). The system automatically extracted phone numbers and Telegram handles from content, linking identifiers across multiple sources — demonstrating cross-source intelligence correlation without manual search. Collection period: 11 Nov 2025 to 23 Jun 2026.

Sourcing, Limitations & Confidence

Data Acquisition

Automated open-source collection via Anveshak platform. Sources configured by analyst — web scraping (Crawl4AI), social media adapters (Telegram, Reddit, Bluesky, X), and RSS feeds.

Analysis Period

3337 content items from 17 sources, processed through multilingual NLP (spaCy + NLLB-200), narrative clustering (Leiden algorithm), and entity extraction.

Confidence Calibration

Confidence level (72%) reflects the fraction of narrative clusters corroborated by 2+ independent sources. Individual source credibility scores are auto-adjusted based on deepfake detection, contradiction analysis, and analyst feedback.

Limitations

This report is a point-in-time snapshot. Source credibility scores may have changed since generation. All AI-generated summaries require analyst verification. Legal provision mappings (if present) are AI-generated and require verification by a qualified legal officer.
